## Academic Professions

---

### University of Vienna

SCIENTIFIC PROJECT STAFF AT THE DEPARTMENT OF BUSINESS DECISIONS AND ANALYTICS

- Contest theory
- Mechanism design
- Industrial organization

Vienna (AUT)

May 2021 - current

### Alpen-Adria Universität Klagenfurt

PRE-DOCTORAL RESEARCHER AT THE DEPARTMENT OF ECONOMICS

- Contest theory
- Industrial organization

Klagenfurt (AUT)

Sep. 2019 - current

### Alpen-Adria Universität Klagenfurt

SCIENTIFIC ASSISTANT AT THE DEPARTMENT OF GEOGRAPHY

- Econometric analysis of micro public transport

Klagenfurt (AUT)

Mar. 2018 – Sep. 2019

### Alpen-Adria Universität Klagenfurt

TEACHING ASSISTANT AT THE DEPARTMENT OF GEOGRAPHY

Klagenfurt (AUT)

Oct. 2016 – Feb. 2017

### Alpen-Adria Universität Klagenfurt

RESEARCH ASSISTANT AT THE CENTRE FOR PEACE STUDIES AND PEACE EDUCATION

Klagenfurt (AUT)

Oct. 2016 – Feb. 2017

## Education

---

### Alpen-Adria Universität Klagenfurt

PH.D.: MODELING, SIMULATION AND OPTIMIZATION IN ECONOMICS

- Cumulative dissertation in game theory with contributions to:
  - Contest theory
  - Mechanism design
  - Industrial organization

Klagenfurt (AUT)

Sep. 2019 - current

### Alpen-Adria Universität Klagenfurt

MSc. IN INTERNATIONAL MANAGEMENT

- Masterthesis: The enclosure of the intellectual sphere · Top grade

Klagenfurt (AUT)

Oct. 2014 - Sep. 2018

### Alpen-Adria Universität Klagenfurt

BSc. IN BUSINESS ADMINISTRATION

- Bachelorthesis: Impact measurement methods in social entrepreneurship · Top grade

Klagenfurt (AUT)

Oct. 2011 - Jul. 2014

## Contesting Fake News

WITH BEATRICE ROUSSILLON AND PAUL SCHWEINZER – [ONLINE AVAILABLE HERE](#)

*CESifo Working Paper*

*Sep. 2023*

**Abstract:** We model competition on a credence goods market governed by an imperfect label, signaling high quality, as a rank-order tournament between firms. In this market interaction, asymmetric firms jointly and competitively control the underlying quality ranking's precision or verifiability by releasing individual information. While the labels and the information they are based on can be seen as a public good guiding the consumers' purchasing decisions, individual firms have incentives to strategically amplify or counteract the competitors' information emission, thereby manipulating the label's (or ranking's) discriminatory power. Elements of the introduced theory are applicable to several (credence-good) industries which employ labels or rankings, including academic departments, books, music, and investment opportunities.

## Choose Your Auction: Mechanism design for a bidder

WITH DMITRIY KNYAZEV – [ONLINE AVAILABLE HERE](#)

*SSRN Working Paper*

*Oct. 2023*

**Abstract:** This study discusses the maximization of a bidder's utility in auctions by leveraging the information about a bidder's value to formulate the auction's rules. To make the analysis interesting, the research focuses on auction formats perceived as fair and unbiased, in line with common European Union or World Trade Organization procurement regulations. In the main model setup, we do not allow the auctioneer to pay the bidders and characterize a preferable auction format as a second-price auction which pools – i.e., does not distinguish between – certain sets of bids. The analysis is then extended to allow for transfers towards bidders. In this more permissible environment we demonstrate that a substantially positive net interim utility can be guaranteed to a bidder without running a deficit in equilibrium. The theory is applied to a model of favoritism, discussing whether forms of preferential treatment in auctions are preventable or detectable.
